

Client Case Study:

Colorado Mental Health Institute at Pueblo

Medical Edge Recruitment has been a recruitment and staffing partner for the Colorado Mental Health Institute at Pueblo since Spring of 2019. In that time, we have successfully recruited and staffed more than 500 providers for the CMHIP facility. We have a great understanding of the location, culture, and processes of the facility which will help us successfully recruit full-time employees for the CMHIP facility. Our focus on provider experience and retention has created a consistent supplemental workforce for this secure lockdown mental health facility. We have also staffed housekeeping, dietary and dining, and custodial staff for the facility and other CDHS facilities.

As a recruitment partner for CMHIP, we have continued to perform ongoing needs assessments for the facility to ensure we continue to identify and retain quality providers to supplement full-time staffing needs. This includes market rate assessments by position, the healthcare industry, and location to provide comprehensive salary and pricing structures. Our recruitment is complemented by a comprehensive candidate database and marketing program.
